PROFESSIONAL SUMMARY

Engineering Technologist registered with the Board of Engineers Malaysia (BEM) with professional experience across aviation engineering, aerospace manufacturing, automotive engineering, and industrial project management. Currently serving as **Director of Aviara Services Synergy Sdn. Bhd.**, leading aviation services operations including **aircraft teardown, aviation asset recovery, aircraft recycling, and aircraft cleaning services at airport operational environments.**

Experienced in managing aviation **end-of-life (EOL) aircraft programs**, engineering coordination, manpower deployment, and aviation operational services. Strong background in project management, technical sales, tender management, aviation operations, and international collaboration within the aerospace industry.

KEY EXPERTISE

- Aircraft Teardown & End-of-Life (EOL) Programs
- Aircraft Asset Recovery & Aviation Materials Recycling
- Aircraft Interior & Exterior Cleaning Operations
- Aviation Project Management & Operations
- Engineering Design & CAD Development
- Technical Sales, Proposal & Tender Management
- Aviation Manpower Deployment & Operational Planning
- Aerospace Industry Collaboration & Business Development

PROFESSIONAL EXPERIENCE

Director – Aviara Services Synergy Sdn. Bhd.

2024 – Present

Lead the strategic direction and operational management of aviation engineering and airport services.

Aircraft Teardown & Asset Recovery

- Manage aircraft dismantling projects involving structural cutting, component removal, and carcass processing.
- Oversee segregation of aviation metals including aluminium alloys, titanium alloys, and structural steel.
- Coordinate aircraft material recovery and scrap management for recycling and resale markets.

Aircraft Cleaning Operations

- Manage aircraft interior cleaning operations including night-stop cleaning, turnaround cleaning, and deep cabin cleaning.
- Deploy trained manpower teams responsible for cabin cleaning, seat maintenance areas, lavatories, galleys, and cargo compartments.
- Ensure all operations comply with airport safety regulations and aviation operational standards.

Aviation Operations & Project Management

- Coordinate aviation projects within airport operational environments including hangar and apron areas.
- Manage project manpower consisting of local and foreign workers to meet operational deadlines.
- Ensure compliance with safety, operational procedures, and client service standards.

Business Development

- Lead aviation services tender submissions and commercial negotiations.
- Establish partnerships with aerospace engineering companies and aviation service providers.
- Engage international buyers for aviation metals and recovered aircraft materials.

Project Manager – CTRUK Boats Sdn Bhd

December 2024 – May 2025

Responsible for managing engineering coordination and project development for the **Airfish 8** program, supporting design development, engineering documentation, and cross-departmental collaboration.

Key Responsibilities

- Managed engineering coordination for the **AF8 project**, ensuring project timelines and technical requirements were met.
- Supervised design development including **3D modelling and CAD engineering drawings** for production and engineering approval.
- Coordinated with engineering, production, and technical teams to ensure design feasibility and manufacturability.
- Managed project documentation including technical drawings, specifications, and engineering reports.
- Supported project planning, technical review, and design implementation.
- Liaised with stakeholders across multiple departments to ensure smooth project execution.
- Assisted in engineering improvements and design optimization during project development

Strategic Planning & Sales Engineer – DRB-HICOM Defence Technologies (DEFTECH Aviation)

April 2021 – December 2024

- Provide technical support to the sales team and customers during the sales process.
- Develop detailed project plans, including scope, objectives, timelines, and resource allocation.
- Conduct feasibility studies and risk assessments to ensure project viability.
- Coordinate with stakeholders to define project requirements and specifications.
- Oversee all phases of project development, from initial design to final implementation.
- Ensure projects are completed on time, within budget, and to the required quality standards.
- Manage project resources, including personnel, equipment, and materials.
- Review project costing and pricing.
- Provide technical guidance and support to project teams.

- Assist in the development and implementation of sales strategies to meet sales targets.
- Conduct site visits and attend meetings with clients to assess their needs and provide tailored solutions.
- Provide feedback from customers to help improve product offerings and customer satisfaction.
- Execute sales and marketing activities, including customer engagement, event participation such as DSA and LIMA, preparation of proposal, marketing material, and tender participation for both commercial and defense segment.

Executive Technical Liaison – Honda Malaysia Sdn Bhd

July 2019 – April 2021

- Liaison between various departments, including engineering, manufacturing, and supply chain, to facilitate seamless communication and collaboration.
- Provide technical guidance and support to internal and external teams, assisting in issue resolution and problem-solving related to products or components.
- Support quality improvement initiatives by identifying areas for enhancement, conducting assessments, and implementing corrective actions as required.
- Contribute to process improvement strategies, leveraging feedback and insights to enhance technical operations and efficiency.
- Conduct and evaluate for symptom confirmation with MQ for first analysis.
- Join LP (Local Supplier) Supplier on symptom confirmation.
- Assist Genba in market for symptom confirmation.
- Other improvement related to defective part arrival and accuracy in preanalysis.
- Issuance QIC of High-Cost Claim (HPPM) for every single transmission and request by other KD supplier if any.
- Warranty for HPM (Honda Production Malaysia) and KD (Knock Down) supplier QIC Issuance.
- Involve direct communication with MQ on any judgement or rejection prior to Genpo and supplier requirement.
- To conduct first filter on any reapplication, claim after clarify with MQ.
- To analyze data extension warranty 4th and 5th years.
- Other improvement related to warranty claims and monthly monitoring.

Executive Production – Uptodate Manufacturing Sdn Bhd

February 2019 – July 2019

- Supervise day-to-day production activities, ensuring adherence to schedules and quality standards.
- Identify opportunities for process optimization and efficiency enhancement within the production line.
- Allocate resources effectively, including manpower, machinery, and materials, to meet production targets.
- Monitor and maintain high-quality standards, implementing quality control measures and corrective actions when necessary.
- Lead and motivate production teams, fostering a culture of accountability, teamwork, and continuous improvement.
- Ensure compliance with safety regulations and guidelines, promoting a safe working environment for all employees.
- Collaborate with the inventory team to manage stock levels, minimizing wastage and optimizing inventory turnover.
- Generate regular reports on production metrics, including output, efficiency, and quality.

EARLY CAREER EXPERIENCE

Calibration Engineer (Intern) – Gasbox Solution (2018)

- Performed calibration of pressure valves, transmitters and gauges.
- Conducted calibration work at Petronas aviation fuel facilities.

Aircraft Technician (Intern) – CTRM Aviation (2014)

- Participated in aircraft composite manufacturing and assembly processes.
- Conducted sheet metal repair and aircraft component installation.

EDUCATION

Bachelor in Aircraft Engineering Technology (Mechanical)

University Kuala Lumpur – Malaysian Institute of Aviation Technology

Diploma in Aircraft Maintenance Technology (Manufacturing)

University Kuala Lumpur – Malaysian Institute of Aviation Technology

RESEARCH PROJECT

1. Experimental and Analysis of Recycle Jute
2. Designing Close Compartment with Injected Spray Resin System for Pull Winding Process
https://www.researchgate.net/publication/328448606_Investigation_of_closed_compartment_moulding_for_pull-winding_process

CERTIFICATES & AWARDS

1. Certificate Of Registration Engineering Technologist (BOARD OF ENGINEER MALAYSIA)
2. Certified Dangerous Goods Professional (CIVIL AVIATION AUTHORITY OF MALAYSIA)
3. Safe Handling of Forklift Truck (LIFE SAVING PRO ACADEMY)
4. IATF 16949:2016 Awareness Training (NOVO QUALITY SERVICES)
5. GOLD MEDAL Undergraduate Research Competition & Exhibition (URCE 2017)
6. GOLD MEDAL 7th Apprentice Innovation & Research Exhibition (AIREx) 2018
7. BRONZE AWARD SIRIM Invention, Innovation & Technology Expo (SI2TE) 2018
8. Presented (International Conference of Aerospace & Mechanical Engineering)

TECHNICAL SKILLS

Aviation Engineering | Aircraft Teardown | Aviation Operations | Project Management | Engineering Design | Technical Sales | Tender Management | CATIA V5 | Microsoft Office
